

## IMPELLER PUMPS SUCTION AND PRESSURE with flexible impeller

### Applications

Stainless steel impeller pumps of **Romex** are commonly used, due to their advantages, in food industry. Associated underpressure at pump inlet, allows the pumps to be used extensively in e.g. milk collection systems installed on tankers, stationary collections Systems or in water distribution systems.

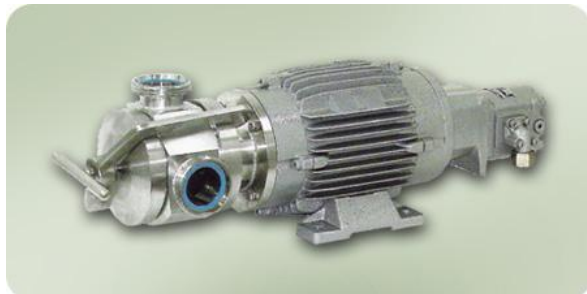

### Advantages

- **Self-priming.**
- **Can be applied in dosage systems.**
- **Suitable for pumping high viscosity liquids without a risk of destruction of the medium structure.**

Version equipped with DN 50 threads

## Versions

### Electric-hydraulic drive pump

available delivery rates:

**24.000 L/h and 30.000 L/h.**

### Electric drive pump

available delivery rates:

**24.000 L/h and 30.000 L/h.**

### Hydraulic drive pump

available delivery rates:

**18.000 L/h, 24.000 L/h and 30.000 L/h.**
